No:

**EXPORT OF PORCINE SEMEN TO INDIA
HEALTH CERTIFICATE
EXPORTING COUNTRY: UNITED KINGDOM
FOR COMPLETION BY: OFFICIAL VETERINARIAN**

I. Information concerning the donor boar(s)

Breed	Age	Official Ear Mark	Place of Birth	Herd Book Registration No.

II. Information concerning the semen

- a) Date(s) of collection:
- b) Number of doses and volume of each:
- c) Identification code:

III. Place of collection of the semen

- a) Name and address of semen collection centre:
.....
.....
.....
- b) Registration number:
- c) Name and address of owner of the donor boar(s):
.....
.....
.....

IV. Destination of the semen

- a) Name and address of exporter:
.....
.....
- b) Name and address of consignee:
.....
.....
- c) Means of transportation (including registration number of vehicle, flight number of aircraft or name of ship):
.....
- *d) Import Permit No:

V. General Conditions

- (a) as far as can be determined, the donor boar(s) has/have a normal libido and is/are are free from genetic defects with no association with genetic defects in near relatives;
- (b) the exported semen has been obtained from boars which come from breeding programmes involving progeny testing;

VI. Health Information

I, the undersigned Official Veterinarian, certify that:

- (a) on the day the semen was collected, the donor boar(s) showed no clinical signs of any disease capable of being transmitted through semen;
- (b) the donor boar(s) was/were born and have been continually resident in the United Kingdom;
- (c) the United Kingdom is officially free from foot and mouth disease (Types C, SAT 1, 2, 3), rinderpest, African swine fever, swine vesicular disease, teschovirus encephalomyelitis (enterovirus encephalomyelitis, Teschen disease), vesicular stomatitis and Aujeszky's disease;
- (d) the semen described above was collected, processed, packaged and stored in a semen collection centre/storage facility approved by the competent veterinary authorities of the United Kingdom, which is under official veterinary control and operates in accordance with the conditions laid down in European Union (EU) Council Directive 90/429/EEC (as amended);
- (e) the donor boar(s) has/have been inspected and found to have no clinical signs of foot and mouth disease, classical swine fever, vesicular stomatitis, swine vesicular disease, swine influenza, atrophic rhinitis of swine, rift valley fever, porcine brucellosis, leptospirosis, porcine reproductive and respiratory syndrome (PRRS), transmissible gastro-enteritis, vesicular exanthema, classical swine fever, teschovirus encephalomyelitis (enterovirus encephalomyelitis, Teschen disease) and tuberculosis;

- (f) all donor boars entering the approved semen collection centre were subjected to a period of quarantine of at least 30 days in officially approved accommodation where only animals having at least the same health status were present;
- (g) the donor boar remained in isolation at the semen collection centre for a period of at least 30 days during which it was tested as follows, with negative results (as per the OIE Terrestrial Animal Health Code):
 - (i) brucellosis - * buffered brucella antigen test (BBAT) or * competitive enzyme-linked immunosorbent assay (cELISA) or * complement fixation test (CFT);
 - (ii) tuberculosis - a comparative intradermal tuberculin test using avian and bovine tuberculins with negative results when read at 72 hours after injection of tuberculin;
 - (iii) Aujeszky's disease - * SNT or * whole virus gB ELISA using all the Aujeszky's disease viral antigens;
- (h) the semen been handled/processed in accordance with the provisions of the OIE Terrestrial Animal Health Code;
- (i) the donor boar was clinically healthy and passed the required pre-entry tests within 30 days prior to entry into isolation at a semen collection centre;
- (j) the semen described above was treated with a mixture of antibiotics to ensure freedom from microorganisms, in particular leptospires and mycoplasmas, and placed in transport containers which will ensure its sanitary status is protected.
