

EXPORT OF BOVINE SEMEN TO KENYA

NOTES FOR GUIDANCE FOR OFFICIAL VETERINARIANS AND EXPORTERS

IMPORTANT

These notes provide guidance to Official Veterinarians (OV's) and exporters and should have been issued to you together with export certificate 6258EHC. These Notes for Guidance (NFG) are not intended to operate as a standalone document but in conjunction with certificate 6258EHC.

Exporters are strongly advised to verify the requirements of the importing country by contacting the veterinary authorities, or their representatives in the UK, in advance of each consignment.

1. Scope of the Certificate

Export health certificate 6258EHC may be used for the export of bovine semen from the United Kingdom to Kenya.

2. Certification by an Official Veterinarian (OV)

This certificate may be signed by a Veterinary Officer of the Department or a Local Veterinary Inspector (LVI) appointed by the Department for Environment, Food and Rural Affairs (Defra), the Scottish Government Rural Directorate, the Welsh Assembly Government Department for Rural Affairs or by the Authorised Veterinary Inspector (AVI) appointed by the Department of Agriculture and Rural Development, Northern Ireland, who is an Official Veterinarian (OV) on the appropriate export panel for export purposes.

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

A certified copy of the completed certificate must be sent to Animal Health Central Operations for Export at Carlisle within seven days of signing, or in the case of Northern Ireland to DARD, Dundonald House, Belfast.

The OV should keep a copy for his/her own records.

3. Obtaining an import permit

The exporter/agent should be aware of the requirements of the importing country particularly with respect to the requirement for an import permit. The import permit number should be given in the health certificate at paragraph III (5).

4. Schedules

Paragraph I refers: A separate schedule may be used to identify the animals certified. This schedule must contain the same information as that required in paragraph I and paragraph I must be annotated "See attached schedule". Each page of the schedule must bear a page number and the health certificate reference number and must be signed, dated and stamped by the Official Veterinarian (OV).

The schedule must be stapled inside the health certificate and the OV should "fan" and stamp over the pages of the schedule and certificate. The top stapled corner of the schedule and certificate should be folded over and stamped also. Any blank spaces in the schedule or in paragraph I must be deleted with diagonal lines.

5. Notifiable disease clearance (form 618NDC)

Paragraphs IV (d) and IV (r) refer: OV's may certify paragraphs IV (d) and IV (r) on behalf of the Department provided written authority to do so has been obtained on form 618NDC from the local Animal Health Divisional Office (or equivalent in Northern Ireland).

6. Laboratory tests

Samples must be sent for testing to the laboratories of the Veterinary Laboratories Agency (VLA). The majority of pre-export tests are

carried out at the Veterinary Laboratory Agency (VLA New Haw, Weybridge, Addlestone, Surrey, KT15 3NB, Tel:01932 357335). Some tests are carried out at the regional VLA laboratories. For operational reasons however, the laboratories involved may change periodically. Accordingly, OV's should check with the VLA to establish to which laboratories samples should be sent for testing. Samples should always be received in advance of the export date. If in doubt as to the procedures for collection, the requirement for transport medium if any, dispatch of samples and the length of time a test is likely to take, OV's should seek the advice of the relevant laboratory.

7. **BSE-related**

Paragraph IV (u) may be certified from sight of the donor bull's passport or knowledge of the donor bull's records.

8. **Sealing of the transport container**

Paragraph IV (w) (c) refers. The semen must be secured within a cryogenic container by a tamperproof seal applied in such a way that the container cannot be opened without breaking the seal. The number on the seal must be entered at paragraph III (3) on the health certificate.

If it is necessary to top up the container, topping up should be done in the presence of an Official Veterinarian (OV) who must apply a new tamperproof seal. The OV must endorse paragraph III (3) on the health certificate with the new seal number, giving name and signature and dating and stamping the endorsement in the margin of the certificate in any ink colour **other than black**.

9. **Disclaimer**

The DEFRA disclaimer (Form 372DMR) will be issued to the exporter with this certificate for his/her information. The certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the Central Operations for Exports in Carlisle via the link below:
