III. Destination of the animals

a) Name and address of consignee:

b) Address of destination of the animals:

c) Means of transportation:
(Registration of Vehicle / Flight No. / Name of Ship)

IV. Health information

I, the undersigned Official Veterinarian, certify that the animals described above meet the following requirements:

(a) the United Kingdom is free from the following notifiable diseases in accordance with the World Organisation for Animal Health (OIE) Terrestrial Animal Health Code:

- African swine fever (ASF);
- classical swine fever (CSF);
- swine vesicular disease (SVD);
- foot and mouth disease (FMD);
- enterovirus encephalomyelitis (Teschovirus encephalomyelitis, Teschen disease);
- porcine brucellosis (*Brucella suis*).

Vaccination against these diseases is not permitted in the United Kingdom;

(b) the premises of origin are not situated in an area/zone subject to official restrictions due to a notifiable disease to which pigs are susceptible;

(c) the animals described above were born and reared entirely in the United Kingdom;

(d) within 21 days prior to the date of export, blood and nasal swabs taken from the pigs described above were sent to Government-approved laboratories and subjected to the following tests with negative results, which are attached to this certificate:

(i) transmissible gastro-enteritis - differential ELISA;
sampling date:

(ii) atrophic rhinitis of swine - bacteriological examination of nasal swabs for toxigenic strains of *Pasteurella multocida*;
sampling date:

(e) on (date) being not more than 30 days and not less than 7 days prior to shipment, the animals described above were vaccinated with a licensed inactivated vaccine against swine erysipelas;

(f) on (date), being within five days of export, the animals described above were treated with the following licensed broad spectrum anthelmintic in accordance with manufacturer's instructions:

Name of product:

Active ingredient:

(g) on (date), being within five days of export, the animals described above were treated for external parasites with the following licensed product in accordance with manufacturer's instructions:

Name of product:

Active ingredient:

(h) on (date), being within 24 hours of loading for export, the animals were examined and found to be free from clinical signs of infectious or contagious disease, including endo- and ectoparasites, and were fit to travel;

(i) a signed undertaking has been received from the owner/exporter stating that the following arrangements have been made regarding the transportation of the animals from the premises of origin to their destination;

(i) they will be transported directly to the airport/port of shipment in the UK in containers/vehicles previously cleansed and disinfected with an approved disinfectant;

(ii) they will be transported without coming into contact with any animals other than those meeting the requirements of this certificate;

(iii) they will be transported to their destination safely and humanely in accordance with the Live Animal Regulations of the International Air Transport Association (IATA).

V. Validity of Certificate

This health certificate is valid for 10 days from the date of signature.
